

Amendments to the Specification

Specification

The disclosure was objected to because of the following informalities: “user interface 95” on page 19, line 19 should apparently read “user interface 96”.

Please replace paragraph 4 on page 19 with the following amended paragraph:

FIG. 10 illustrates an example user interface ~~[[95]]~~ 96 presented by router 10 by which an operator hierarchically defines routing logic and constructs a rule for rule set 38. In particular, the operator can input a rule name 97, and hierarchically define specific data tags, 95, logical operators 98 and corresponding data values 99 for the rule as a complex grammar.
